The safest weapon against ticks...

SafeCard is discharging old "good" advises when removing ticks on your pet.

With the SafeCard the tick is removed in the most aesthetics, effective and safest way on both humans and animals.

SafeCardis developed in co-operation with scientists, biologists and doctors with special subject in ticks and tick-related diseases.

The safest weapon against ticks...

Anatomical the card is designed to be used all over the body and it is easy to carry in the purse, the bag, the pocket etc.

Also unique to remove stings from bees.

The safest weapon against ticks...

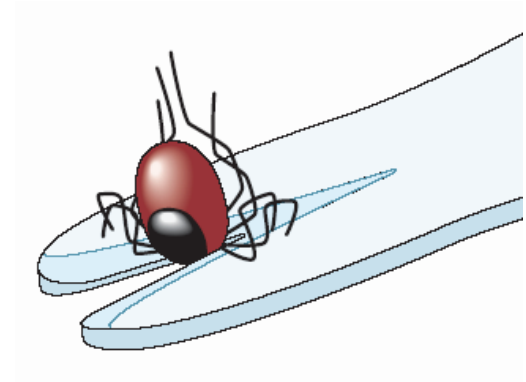

New research shows that traditional methods of removing ticks can increase the risk of serious side-effects. Because as soon as a tick is squeezed, twisted or in any other way attacked, the risk of it injecting dangerous bacteria into the bloodstream of its host is increased.

Bacteria, that can cause infection of the mucous membranes, or even paralysis of the face muscles.

The safest weapon against ticks...

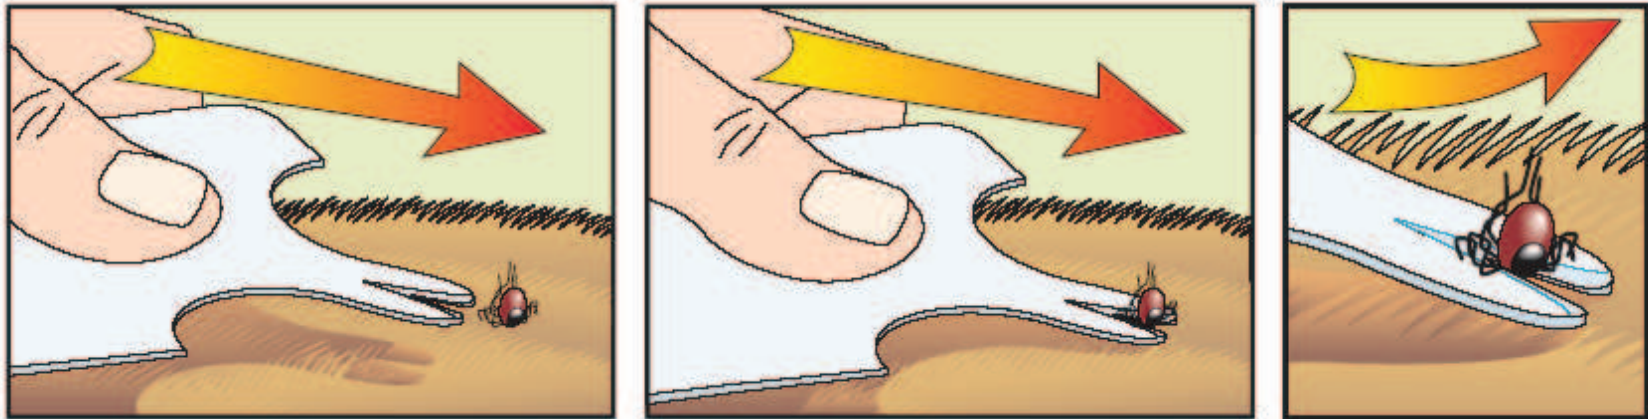

The new tick removal card, SafeCard, utilizes an entirely new principle:

Ticks are removed quickly and safely, without the use of force. Simply lever the tick out using the specially-developed card with a single gentle movement. This method helps avoid ticks releasing their dangerous bacteria into the bloodstream.

How to remove ticks with the SafeCard

Easy to use and easy to carry...

Because the handy credit card format makes it always available

The ultimate tool against venom from Killer Bees

If a pet is stung by a swarm of Africanized bees, the veterinarians recommends:

- React immediately
- Look for stingers
- Pull stingers out

Do not pull them out with tweezers or fingers because this will release more venom into the animal. With a SafeCard you can remove the sting fast and safe.

SafeCard - an ideal promotional item

- It is cheap
- It is small
- It has a big surface to print on

and most important

- It is useful and helpful – so nobody will throw it away

Some examples

Individueller Prägebereich 76 X 12 mm

Materials and colors

SafeCard is produced in the material ABS, (Acrylnitril Butadien Styren), which is the same material as Lego-bricks and it is environmental safe.

SafeCard can be delivered in your logo-color or any color you wish

The cover

The cover can be designed as you like it.

It also shows how to use the tick card.
